ST1AC Unlisted Options:	2,500,000
ST1AB Performance Rights:	2,570,000

Spirit is pleased to provide its Quarterly Activity report to our shareholders.

Highlights:

- Receipts from customers increases 12% over the December quarter, to \$3,355,000
- Net cash from operating activities increased 90% for the quarter, to \$101,000
- Total Buildings connected to Spirit's network increased by 58, for the YTD total of 118 buildings. This brings Spirit's total on-network ("on-net") buildings to 306.
- Debt paydown of \$210,000 off the principle Bank debt facility
- Closing cash balance for the quarter was \$1.07 Million

Spirit Telecom Limited (ASX: ST1) ("Spirit") is pleased to provide shareholders with the 3rd quarterly activities report and Appendix 4C for the quarter ended 31 March 2017.

During the quarter, Spirit's activities were focused on developing key strategic areas, considered important for Spirit's growth and development.

These include:

- Growing Spirit's network through the addition of buildings in the residential and commercial sectors
- Increasing the customer numbers within its on-net buildings
- Developing the sales and marketing resource, to enable a faster path to growing customer numbers
- Working with building owners to increase the number of connected apartments, for future growth and deployment.

Spirit is pleased with the growth of on-net buildings to 306. The deployment of 58 buildings, more than double that of Q1/17, shows the continued appetite the market has for Spirit's superfast Internet and voice services. The Capex used in these buildings, for the quarter is \$545K, or an average of \$9,396/building. The financial year to date in-building capex spend is \$1.27 million or \$10,846/building, across the 118 buildings added this financial year.

In the residential sector the number of connected apartments grew to 18,100 for the March quarter. Active customers within the residential and student apartments grew to 3,907, which is a growth of 9% over the December quarter.

One of the more significant buildings was the addition of the Eureka Tower in Melbourne. Spirit entered the building more than a year after NBN and regardless of the 'first to market advantage' that NBN had, Spirit was able to gain nearly 20% of residents since activating Eureka Tower in late February 2017.

Spirit's Managing Director Geoff Neate commented:

"This quarter's growth in buildings and Connected apartments has been encouraging. It shows what we are capable of and is a credit to the team's ability to compete against much bigger players in the industry. Our biggest test was to give NBN such a head start and we exceeded our expectations in a very short time"

The overall growth of Spirit has been healthy, with revenues increasing in all categories. As is illustrated in the chart below, the growth in building revenue, relative to total, is continuing to increase. In addition, non-building revenue has grown, providing an overall healthy increase in total revenue.

Factors affecting Australian Telco sector

- Gross margin reduction experienced by NBN resellers, brought about by the NBN’s pricing structure:

Spirit deploys and manages a totally separate network to the NBN. Because Spirit deploys ‘switched Ethernet’ in its buildings it does not resell NBN and is therefore does not experience the same negative margin impact being experienced by NBN resellers (see below).

- Competitor’s plan to build an alternative mobile network

Spirit’s network development is focused on providing superfast internet and ancillary services, such as voice, to the commercial and residential sector. The entry of another mobile network is not expected to impair Spirit from achieving its growth objectives.

A single end user on a 25/5Mbps NBN service requires a \$27 access fee and \$15.25 of CVC2, compared to Spirit’s less than \$10 for 25/25Mbps

1. Based on a 25/5 Mbps service
 2. Based on industry average of 1Mbps/user

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
