ASX/Media Release

Spirit Telecom declared as Melbourne's Fastest Internet provider

On November 8th 2017, Ookla announced Spirit Telecom (ASX ST1) as Melbourne's Fastest Internet Service provider (ISP)*. This is a great testament to Spirit's network and ability to beat its bigger rivals. As at November 2017, 68% of Spirit's residential customers are on speeds greater than 25Mbps.

Spirit continues to roll out its fast internet services in Sydney and Gold Coast areas and will expand in other areas in due course.

**The qualification for fastest ISP requires a greater than 3% market share*
