PHONE TECHNOLOGIES THAT ARE MANAGED IN THE CLOUD!

Technology is evolving faster than ever. With your employees becoming more mobile and your clients demanding instant communication, how do you adapt?

The answer — our Hosted PBX or SIP solution delivered over the Spirit network. Experience the convenience and functionality of a phone system managed in the cloud, or a quality SIP service connected to your onsite PBX.

Hosted PBX and SIP, especially on Spirit's Super Fast independent network, provide a cost effective alternative to the ageing and soon-to-be decommissioned copper network across Australia.

Spirit Hosted PBX

Spirit Hosted PBX is essentially an automatic switchboard for your business telephone system that is built and maintained in a secure cloud environment.

Spirit Hosted PBX is a virtual phone system that lets you utilise all the advanced features of traditional office phone systems, without having to invest in a hardware-based PABX, or maintaining the costly and complex equipment on your premises. Whether you require three telephone handsets or 300, Spirit Hosted PBX delivers a high quality world class voice system across either a single-location or national multi-site organisation. It also provides business grade unified communications features, such as reception consoles, voice and video services, instant messaging and presence, all at one low predictable monthly spend.

To complement your implementation, we can deliver advanced features such as, call centre solutions, auto attendants, call recording and more for an integrated experience.

To achieve the best call quality, stability and scale, Spirit voice solutions perform best when running over the Spirit network

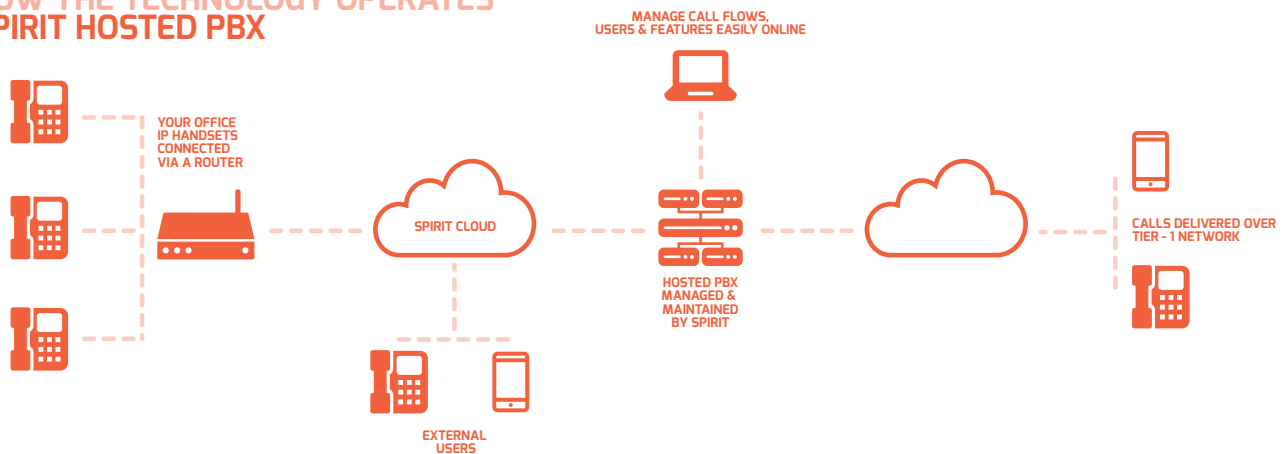

We will work with you to ascertain and choose the level of telephony service you need, with no expensive hardware, configuration, maintenance or management required. We also offer onsite training to make your implementation smoother to ensure you maximise the features and benefits of your new Spirit Hosted PBX system.

Why choose Spirit Hosted PBX?

- Simple to manage online
- Low up-front costs
- Lower IT and telephony costs (converged network)
- Quick deployment
- Fully portable and easily scalable
- No physical PABX to maintain
- One platform for all office locations
- Geographically independent
- Employees can be easily relocated

HOW THE TECHNOLOGY OPERATES SPIRIT HOSTED PBX

Spirit SIP

Session Initiation Protocol (SIP) is the digital equivalent of a phone line. A SIP channel replaces a traditional phone line and enables you to make and receive voice calls using your data connection.

SIP is used in offices, to enable access to the telephone network via an IP-enabled PBX (fixed hardware) phone system or unified communications platform. SIP provides a digital connection, sending calls between the PBX and telephone network.

SIP complements an old-style "box on the wall" at your premises with additional virtual phone lines. We simply install a digital card to use a SIP channel, which is more resilient and economical than physical phone lines like ISDN and PSTN lines.

To achieve the best call quality, stability and scale, Spirit voice solutions perform best when running over the Spirit network.

We have a range of cost effective call plan options available and we'll work with you to ascertain and choose the level of telephony service you need, with no expensive configuration, maintenance or management required.

Why choose Spirit SIP?

- Geographically independent
- Low up-front costs
- Lower IT costs
- Quick deployment
- Significantly reduce ongoing telephone costs
- Easily scalable
- One platform for all office locations
- Geographically independent
- Employees can be easily relocated

About Spirit

Established in 2005, Spirit is an ASX listed (ST1) provider of Super Fast Internet, cloud solutions, telephony services and Phone Names.

Our network, spanning more than 15,000km across the eastern seaboard, offers services to diverse business and residential markets.

We are a genuine alternative to the NBN. We believe that Australians deserve better Internet and connected solutions and that's why we built our own network. It's different and we think that's better. We call it Serious Internet.

Why choose Spirit?

The answer is simple. We invest in the most exciting Internet technology around. We don't compromise on reliability, speed or accessibility and we make the seemingly impossible possible by going where others cannot. You benefit with a smoother, more responsive business and happier employees and customers.
