OR MULTIPLE SITES**

**AMAZING CALL
QUALITY**

**ENABLES BUSINESS
CONTINUITY**

MOVE YOUR VOICE SERVICES TO THE CLOUD NOW

Technology is evolving faster than ever. With your employees becoming more mobile and your clients demanding instant communication, you need to ensure your business can keep up.

Now is the perfect time to assess what your business needs to evolve. Our Cloud UC solution delivered over the Spirit network allows you to experience the convenience and functionality of Unified Communications as a Service (UCaaS) with a range of packages designed for your business.

Cloud UC, especially on Spirit's Super Fast independent network, provides a vastly superior service compared with the ageing and soon-to-be decommissioned copper network.

Spirit Cloud UC

Spirit Cloud UC (Unified Communications) offers a range of communication options to suit your business needs and provides the pay per user per month model that everyone expects from Cloud services.

From basic telephony through to complete collaboration, which gives you the ability to have a single number across multiple devices, Spirit Cloud UC removes the need for major capital investment in technology. There are 3 levels of service available, and you can choose between PAYG or Unlimited landline and mobile calls (Australia and New Zealand).

Spirit Call – Suits home office or private users. This package is perfect for businesses that only have a few phones and just need a simple telephone service. With no complications, this low price package allows you to use your existing supported hardware, and you can purchase any add-ons from us if you need to.

Spirit Connect – Great for small to large businesses who are looking at moving to the Cloud. This package works well for companies with existing on premises telephony or new businesses looking for an enterprise telephony solution. It gives you everything an enterprise phone service provides with reduced hardware meaning lower support and maintenance costs. Additional features are available with this package.

Spirit Collaborate – For businesses of all sizes looking to leverage cutting edge technology. This package has it all. From video and chat to anyone in your company to the ability

to answer your work number on your mobile from anywhere in the world. Perfect for individuals who travel a lot as well as businesses without traditional offices who still want to appear unified and professional. Features include presence – so you can tell at a glance who in your company is busy, on the phone or in a meeting, and location – calls and messages are sent to all your devices so you never miss a thing (e.g. mobile or desk). Additional features are available with this package.

To achieve the best call quality, stability and scale, Spirit Cloud UC performs best when running over the Spirit network. We will work with you to determine the best telephony service and package for your business, and also offer onsite training to make your implementation smoother to ensure you maximise the features and benefits of your new Spirit Cloud UC service.

Why choose Spirit Cloud UC?

- Predictable monthly spend
- Lower IT costs
- No physical PBX to maintain
- Easily scale up and down
- Increased functionality and collaboration
- Allow for flexible work practices and remote working
- On site training available

Why choose Spirit?

Simple. We invest in the most exciting Internet technology around. We don't compromise on reliability, speed or accessibility and we make the seemingly impossible possible by going where others cannot. You benefit from an awesome Internet connection that will help your business be more productive. You'll also have happier employees and customers.

About Spirit

Established in 2005, Spirit is an ASX listed (ST1) provider of Super-Fast Internet, cloud solutions, Unified communication services and Phone Names. Our network, spanning more than 15,000km across the eastern seaboard, offers services to a range of business and residential customers.

Spirit offers a genuine alternative to nbn™. We believe that Australians deserve better Internet and connected solutions and that's why we built our own network. It's different and it's better.
