

REDUNDANCY AS A SERVICE

Back-up Internet service for your business

Fixed wireless
back-up

Minimise loss
of productivity

Reduce impact on
customers and staff

Peace
of mind

Spirit
Different. Better.

THINK OF THIS AS YOUR INTERNET INSURANCE POLICY

There are many reasons for your Internet service to go down, some of which are uncontrollable. Picture a construction worker digging in the wrong place, and accidentally cutting the cable linking to your fibre connection. It's a scary thought and happens more often than you may think.

That's why we offer Redundancy as a Service (RaaS) – a back-up Internet connection when your main one fails. In the event of an outage with your primary provider, your business can fail-over to Spirit's network, keeping you connected at speeds of up to 30/30Mbps*.

The goal of having redundancy is to get you back up and running as quickly as possible and minimise the impact on customers and staff.

WHY CHOOSE SPIRIT

Good question. Because we invest in the most exciting Internet technology around. We don't compromise on reliability, speed or accessibility and we make the seemingly impossible, possible. You benefit from services that will help your business be more productive. You'll also have happier employees and customers. It's a win-win.

*Available to qualified sites. Additional charges apply for more than 200GB data p/month

WHY CHOOSE OUR REDUNDANCY SOLUTION

The only way to have true redundancy is by using a service that transmits data in a completely different way than your primary Internet connection. Spirit's independent network transmits data through the air using our fixed wireless technology – so anything that happens on the ground doesn't affect us.

- Greater reliability across an alternative access technology
- Premium SLA gives you an enterprise-grade service
- Not reliant on private networks of larger companies and resellers
- Static IP address included; BGP supported
- Functions the same as Spirit Sky on a technical level
- Flexible contract terms available

A BIT ABOUT US

Put simply, we're an ASX listed provider of super-fast wireless Internet and cloud-based solutions. We've been 'Internet providing' since 2005, and our network now spans more than 15,000 kms across Australia's East Coast, servicing businesses (and homes) of all sizes and needs. We've built our network to be a genuine alternative to the NBN, because we believe Australian businesses deserve better, faster, more reliable Internet. We call it sky speed Internet.
